

New York Mets – Citi-Field

August 2007: **Advanced Electronic Solutions Inc. (AES)** is proud to announce it has been chosen as the security integrator for Citi-Field. The new, 45,000-seat home of the New York Mets is scheduled to open in 2009. This project includes the installation of over 85 IP video cameras throughout the stadium public and private areas and nearly 100 card access control doors securing the back office operations. Both the video and the access control systems are state-of-the-art IP based systems, linking the new stadium with several remote office sites in the metropolitan area.

Sterling Equities, the Mets ownership group, has expertise and experience in the development and management of premium New York City properties, as well as new minor league ballparks in Coney Island and Port St. Lucie, Fla. The Citi Field project is developed by Queens Ballpark Company, L.L.C. and has been designed by the internationally renowned architects of HOK Sport. HOK Sport has designed and renovated 13 of the 30 major league ballparks in use today and seven of the last eight to open in Major League Baseball. Hunt-Bovis, a joint venture of Hunt Construction Group and Bovis Lend Lease, will provide construction management. AES, one of the New York Metropolitan areas largest privately held systems integrators, will provide and install the venue's security system.
