VOLUME 4, ISSUE 1

AUGUST 25, 2009

Advanced Electronic Solutions Receives UL 2050 Designation

Advanced Electronic Solutions (AES) is proud to announce that we are now a UL listed Security Integrator. We have complied with UL's stringent standards and have been provided with the UL 2050 listing. This UL 2050 Standard states technical requirements for the installation, maintenance, testing and operation of alarm equipment.

Advanced Electronic Solutions provides a broad array of high-security intrusion detection systems, including those that meet the requirements of UL 2050, DCID 6/9 and NIS-POM. Listed under UL 2050, AES is able to issue certificates to Government and Department of Defense contractors that must meet high-security

intrusion detection requirements. For some applications, we use alarm panels that include 128-bit encryption technology for

transmission to our UL-Listed central monitoring center. For other clients, we integrate these secured areas into the access control system, which, when designed the right way, will meet UL 2050 requirements. In both cases, we comply with DCID and NIST regulations. In addition, we are able to provide remote monitoring to a

UL-Listed central monitoring center that uses cleared personnel.
