APRIL 14, 2009

## State of the Art Fire System at Briarcliff Coop Complex

AESFire is proud to announce that they have been awarded the contract to supply the Briarcliff, a thirty one floor luxury coop complex located in Cliffside Park, New Jersey, with a state of the art EST3 Fire Safety System.

EST3 has both the power and the capacity to handle even the largest installations. Supporting Signature Series multi-sensor analog detectors on a multi-priority peer-to-peer token ring network, EST3 boasts exceptional alarm response and virtually fail-safe operation. Remote annunciators round-out this powerful system so that firefighters, emergency response personnel, and building occupants can all keep in touch when seconds count and information can save lives.

Extremely flexible, easy to maintain, and a breeze to service, the EST3 is brimming with design innovations geared expressly towards the goal of providing exceptional performance with a minimum of system overhead.

The Briarcliff will be equipped with:

- 9 Node EST3 Digital 8 Channel Voice Evacuation Fire Life Safety System
- Class A Style 7 Communication Riser for added survivability
- Line Isolation on each floor so a fault on a specific floor only effects that floor.

**Briarcliff, Cliffside Park, NJ**

- 626 addressable devices (i.e. Smoke Detectors, Heat Detectors, Manual Pull Stations etc.)
- 415 Speaker Strobes.

AESFire, is a subsidiary of Advanced Electronic Solutions Inc. (AES) and a factory authorized Strategic Partner for Edwards

Systems Technology (EST), Faraday, Digitize and Vesda, the market leaders in fire detection and Life Safety Systems. We have an in-house engineering department which designs life safety systems to meet the NFPA, AHJ and NEC codes. Our NICET certified installation department works with our client's engineering department to make sure that your system is installed as specified and meets all requirements. We perform tests & inspections as required by local laws and ordinances. Additionally AESFire has a wide range of contract options to keep your Fire and Life Safety Systems in top physical condition. All of our service and installation is backed by our commitment to superior customer service.
